PROFILE SUMMARY

Enthusiastic and detail-oriented Front-End Developer with strong skills in React.js, Next.js, Ionic, and Angular. Passionate about building responsive, user-friendly, and visually appealing web applications that deliver exceptional user experiences. Continuously learning new technologies to stay at the forefront of web development. Looking for an opportunity to apply my knowledge and grow in a dynamic organization.

WORK EXPERIENCE

The LeanSuite | Present – 2025

- Focused on the design and logic of the application, ensuring an intuitive user interface and seamless functionality.
- Designed and developed a dynamic user survey that prompts users with 7 key questions upon login or sign-in to personalize their experience and gather valuable insights.
- Reduced Development Waste: Identified and eliminated unnecessary features, reducing code bloat and ensuring that all product enhancements directly addressed user needs.
- Integrated APIs into various pages and components of the application to dynamically fetch and display data, enhancing user experience and enabling real-time functionality.

Netflix-Clone | 2024

- User Authentication: Implemented a secure login and sign-up system.
 - Responsive Design: Created a mobile-first, responsive interface using CSS Flexbox and Grid to ensure usability across devices.
 - Dynamic Movie Listings: Integrated The Movie Database API to fetch and display movie data, including images, descriptions, and ratings.
 - Search & Filter Functionality: Added search and filter options to allow users to easily find movies and shows based on title, genre, and rating.
